

Constants

A constant is:

Constants give unchanging values a _____ and make program _____ to _____.

Declaring Constants

A constant declaration includes:

-
-
-
-

E.g.

Once you declare a constant, you _____ the _____ of the constant

E.g. `Const dblpi As Double = 3.14`
`dblpi = 22/7`

This would result in an error!

Questions

1. Declare a constant that is of double type called `dblpi` with an assignment of 0.07.
2. Declare a constant that is of integer type called `intcost` with an assignment of 25.
