

Create the following GUI and working program...

```
String cartridges [] = new String[5];
```

```
cartridges[0]= Integer.parseInt(txtColl1.getText());  
cartridges[1]= Integer.parseInt(txtColl2.getText());  
cartridges[2]= Integer.parseInt(txtColl3.getText());  
cartridges[3]= Integer.parseInt(txtColl4.getText());  
cartridges[4]= Integer.parseInt(txtColl5.getText());
```

```
Arrays.sort (cartridges);
```

```
lblMost.setText("The most cartridges collected was: " + cartridges[4]);  
lblLeast.setText("The least amount of cartridges collected was: " + cartridges[0]);
```
